

ORACLE PRODUCTION DBA_4321

SEND RESUMES TO: rpatel@brossgroup.com

Bross Group is a premier IT Consulting and Staffing firm headquartered in Lakewood, CO. We specialize in assisting our clients in the identification of the best IT professionals for their consulting, staff augmentation, direct placement, and application development needs. With over 20 years experience in the IT Consulting industry, we are set apart by our commitment to the success of our clients and goal of making the candidate experience a positive one.

One of our value clients in the Lakewood area is seeking an Oracle Production DBA who will be responsible for supporting Oracle 10/11g RAC databases In AIX and Linux development, test, and production environments, including installation, configuration and deployment of databases; capacity planning and performance tuning; database backup and recovery, database migration, imports, exports and resets; system storage allocation, creation of database storage structures and modifying and altering database storage parameters.

RESPONSIBILITIES:

Applies knowledge, experience and skills to diagnosis issues and improve processes.

Communicates and interacts effectively and professionally with both clients and peers, solves problems efficiently, takes the initiative, and works productively in teams.

REQUIRED SKILLS:

At least ten years of database administration experience (or eight years of experience with a Master's degree) including:

- 1) Installing, configuring, automation, maintaining and supporting multiple Oracle 10g databases on AIX and Linux in development, testing, and 24x7 high-availability production environments
- 2) Hardware, software and system technical analysis and implementation support for system and functionality upgrades
- 3) Migrating and patching databases
- 4) Performance tuning and troubleshooting complex database issues
- 5) Writing shell, SQL and PL/SQL scripts and stored procedures
- 6) Familiarity with UNIX (AIX/Linux) operating system and shell scripting

7) Automation of installation, build, deployment and maintenance operations and procedures

Must have the ability and motivation to: diagnose and solve problems; learn new technologies quickly with minimal support and guidance; think independently; organize efficiently; effectively communicate; interact professionally with both clients and peers; take the initiative; document deployment and troubleshooting procedures; work productively in teams; prioritize work and complete tasks on time; write technical documentation; and lead team efforts when called upon to do so.

DESIRED SKILLS:

Knowledge of and experience with PL/SQL Developer, Oracle Spatial Option / Streams / ASM / RAC / Grid Controller, ESRI Spatial Data Engine, IBM WebSphere, webMethods, XML, AIX and Linux Operation Systems, tuning methods and tools, Java, J2EE, Hibernate, Cognos BI, StarTeam, Quality Center, 24x7 systems, messaging, web services, services-oriented architecture (SOA), enterprise service bus (ESB) technology, MSProject, MSWord, MSEXcel, MSPowerpoint.

TYPICAL MINIMUM:

Normally requires a Bachelor's Degree or higher in Computer Science or other related discipline.

All qualified applicants will receive consideration for employment without regard to race, sex, creed, religion, color, national origin, sexual orientation, veteran status, and mental or physical disabilities. US citizens and Green Card Holders and those authorized to work in the US are encouraged to apply. We are unable to sponsor H1b candidates at this time.
